-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear from claim 1 Claim what is referenced as re-supply count. Moreover, it appears that the claims are incomplete for omitting essential steps, which are needed to produce or calculate the referenced count, such omission amounting to a gap between the steps.

The claims are indefinite because it is not clear what is referenced as "degree of absorption".

The claims are indefinite because it is not clear how can re-supplying compensate the degree of absorption. What should be compensated?

Claim 3 is further indefinite because it is not clear what is required by the requirement to "increment" the count.

Art Unit: 1746

Claim 3 is further indefinite because it is not clear what is referenced as "each passing of the predetermined time". It is noted that claim 1 recites only one "predetermined time" and is silent regarding any repeating of the steps.

Claim 7 is indefinite because it is not clear how the step recited by this claim is related to the steps of parent claims and not clear which second water (initially set or reset one) level is referenced.

Claim 8 is indefinite because the term "the selected wash course" lacks proper antecedent basis.

Claim 8 is also indefinite because the parent claim is silent regarding adjusting the amount of laundry.

Claim 8 is indefinite because it is not whether or not "an amount" recited by this claim is the same "an amount" recited by claim 1.

In view of the indefiniteness of the claims the claims were interpreted at the best examiner understanding. Clarification and/or amendment are respectfully requested.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1746

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over any one of Cracraft (US Patent NO 5,768,729) and Abstract of KR 1999-027766.

Both cited documents teach methods for washing with filling steps comprising the claimed steps of setting the levels, supplying water, sensing water levels, comparing sensed levels, adding water depending from the sensed levels, resetting the levels, determining needed level. Cracraft also teaches determining the properties of laundry and adjusting the washing accordingly.

Thus the claimed limitations are anticipated or obvious over the teachings of Cracraft and KR 1999-027766.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No 4,3030,406 is cited to show the state of the prior art with respect to methods for automatic filling washing machines.
